

Plumbing Industry Training

Bringing skills together

Building
relationships
with the
plumbing
and building
industry

See over for program details

South East Water, in partnership with Chisholm Institute, is developing a suite of training modules for the plumbing / building industry.

Our program aims to build understanding and skills around plumbing work at the interface with water corporation assets. This training initiative will build closer relationships with the plumbing and building industry.

Benefits for participants:

- Keep up-to-date with changes in the plumbing industry and equip your team to meet industry and consumer needs
- Gain clarity and a better understanding of regulatory requirements
- Help improve consumer health and safety and reduce adverse impacts on the environment

All program modules have been mapped to Certificate IV.

Modules offered at \$89 per module.

The program of modules to be available over the coming months includes:

Fire Service Backflow Prevention Testing and Maintenance

Property Sewerage Plans (PSPs) Drawing and interpretation

Recycled Water Residential and Commercial

Water supply metering and servicing

Fire Service Connection & Metering

Trade Waste

Additional modules will be developed over the coming months

Certificate will be produced on completion of each course
